

# Joseph Anthony Pasquale Holsten

## **Skills**

#### **Programming Languages**

Significant experience with Ruby, Portable Bourne Shell & Go, Javascript. Some experience with C, PHP, C#. SQL, Java. Merely dangerous in Python, Scheme, M4, Perl, Haskell, Erlang, TCL & Awk.

#### Operations

Significant experience with configuration management, HTTP Servers, package management, process management, logging & network monitoring. Some experience with firewalls & relational databases. Merely dangerous with LDAP, VPN, Intrusion Detection & Single Sign On.

#### Web technologies

Significant experience with HTTP, REST, HTML, DOM & XML(incl. Namespaces). Some experience with CSS & SAX. Merely dangerous with RDF, SOAP & WSDL.

#### **Operating Systems**

Significant experience with UNIX (Debian, RHEL, OS X & Solaris). Some experience with Windows (NT 4 & 2000 admin, 2003 dev). Want excuses to play with Plan 9 & IBM i (née AS/400).

#### Software engineering

Significant experience with model-view-controller, test driven development, continuous delivery & queueing. Some experience with evented concurrency, key-value databases & document databases.

### Experience

#### Infrastucture Engineer, Simply Measured

2014-02 - 2014-08

Infrastructure buildout, maintenance, & automation: Designed, built and maintained systems to run internal applications and support services. Maintained ~500 servers and ~50 internal applications, averaging a 150 server-to-admin ratio.

Metrics & reporting: Provided services for measuring and reporting performance and usage of internal applications. Education: developed, maintained and trained in procedures for using infrastructure and internal support services. Developed ~100 standard operating procedures and supported ~45 engineers.

Emergency response: developed and maintained on-call processes for engineering teams to respond to their respective application and infrastructure failures.

#### Founder, Operations Guy, Bitp.it

2011-02 - 2011-08

Developed, implemented fully automated deployments using git, chef Ran a node.js service on a single no.de server handling over 400 requests per second Ran a bitcoin mining pool at 100 GHash per second

#### Senior Engineer, Waterfield Technologies, Inc

2007-04 - 2011-09

Developed, implemented fully automated deployment strategies using VMWare, git, chef, & capistrano Developed banking & energy sites using SharePoint, ASP.NET, Ruby on Rails Automated testing, continuous integration site monitoring with Cucumber, RSpec, NUnit, CruiseControl Developed a content publishing service with JSON, HTML & SOAP interfaces

#### Engineer, Mobicentric 2009-10 - 2010-08

Developed a mobile real estate listing service for real estate agents

Optimized a pure ruby RETS client to process ~6000 listings & ~60000 images per day on a single heroku worker

Further experience available upon request

## **Education**

BS Computer Science, Oklahoma State University Tulsa, <u>OK</u>	<u> 2005 – 2010</u>
Cisco Network Academy, Tulsa Technology Center, Tulsa, OK	2002 - 2003

## **Open Source Contributions**

Most of my open source contributions are visible at https:/	/ github.com / josephholsten /	, off-github contributions follow:
7 1	, ,	9

Contributor, glibc	2014
F	

[commitdiff]

Contributor, go

[commitdiff]

<u>2008</u> – <u>10</u>

[XRD]

Contributor, IETF 2009

[Disco, About:]

Contributor, OAuth Extensions 2008

[Session, Language, Scalable]

Contributor, Ruby on Rails

[XmlMini]

## **Presentations**

Saturday Night Disco on Monday Morning, DevOpsDays Austin [video, slides]	2014-05-06
Becoming Fearlessly Definite & Resourceful, ChefConf [video, slides]	2014-04-17
Services in Go: from Proof-of-Concept to Production, Golang Van [video, slides]	2014-02-05

## **Interests**

Augmented Reality, Digital Contracts & Reputation

Espresso, Cigars, Food, & Flavor

Community Organizing, Volunteering & Open Source
