Skills

Programming Languages
Significant experience with Ruby, Portable Bourne Shell & Go, Javascript. Some experience with C, PHP, C#. SQL, Java. Merely dangerous in Python, Scheme, M4, Perl, Haskell, Erlang, TCL & Awk.

Operations
Significant experience with Configuration Management (Chef, Puppet, Ansible), HTTP Servers (Apache, Nginx), Package Management (Deb, MacPorts, Ruby Gems, RPM), Process Management (Upstart, Systemd, Monit) and Logging (RSyslog, Logstash, Loggly), Network Monitoring (Nagios, Server Density) and Rsync. Some experience with Firewalls (IPFilter, IPF), Relational Databases (PostgreSQL, MySQL, SQL Server). Merely dangerous with LDAP, VPN, Intrusion Detection & Single Sign On.

Web technologies
Significant experience with HTTP, REST, HTML, DOM & XML(incl. Namespaces). Some experience with CSS & SAX. Merely dangerous with RDF, SOAP & WSDL.

Operating Systems
Significant experience with UNIX (Debian, RHEL, OS X & Solaris). Some experience with Windows (NT 4 & 2000 admin, 2003 dev). Want excuses to play with Plan 9 & IBM i (née AS/400).

Software engineering
Significant experience with model-view-controller, test driven development, continuous delivery & queueing. Some experience with evented concurrency, key-value databases & document databases.

Experience

Infrastructure Engineer, Ensighten   **2012-11 – Present**
  Infrastructure buildout, maintenance, & automation: Converting ~500 servers to be automated using puppet.

Infrastructure Engineer, Simply Measured   **2012-02 – 2014-08**
  Infrastructure buildout, maintenance, & automation: Designed, built and maintained systems to run internal applications and support services. Maintained ~500 servers and ~50 internal applications, averaging a 150 server-to-admin ratio.
  Metrics & reporting: Provided services for measuring and reporting performance and usage of internal applications.
  Education: developed, maintained and trained in procedures for using infrastructure and internal support services. Developed ~100 standard operating procedures and supported ~45 engineers.
  Emergency response: developed and maintained on-call processes for engineering teams to respond to their respective application and infrastructure failures.

Founder, Operations Guy, Bitp.it   **2011-02 – 2011-08**
  Developed, implemented fully automated deployments using git, chef
  Ran a node.js service on a single no.de server handling over 400 requests per second
  Ran a bitcoin mining pool at 100 GHash per second

Senior Engineer, Waterfield Technologies, Inc   **2007-04 – 2011-09**
  Developed, implemented fully automated deployment strategies using VMWare, git, chef, & capistrano
  Developed banking & energy sites using SharePoint, ASP.NET, Ruby on Rails
  Automated testing, continuous integration site monitoring with Cucumber, RSpec, NUnit, CruiseControl
  Developed a content publishing service with JSON, HTML & SOAP interfaces

Engineer, Mobicentric   **2009-10 – 2010-08**
  Developed a mobile real estate listing service for real estate agents
  Optimized a pure ruby RETS client to process ~6000 listings & ~60000 images per day on a single heroku worker

Further experience available upon request

Education

BS Computer Science, Oklahoma State University Tulsa, OK   2005 – 2010

Cisco Network Academy, Tulsa Technology Center, Tulsa, OK   2002 – 2003

Open Source Contributions

Most of my open source contributions are visible at https://github.com/josephholsten/, off-github contributions follow:

Contributor, glibc   2014
[commitdiff]

Contributor, go   2013
[commitdiff]

Contributor, OASIS   2008 – 10
[XRD]

Contributor, IETF   2009
[Disco, About:]

Contributor, OAuth Extensions   2008
[Session, Language, Scalable]

Contributor, Ruby on Rails   2008
[XmlMini]

Presentations

Saturday Night Disco on Monday Morning, DevOpsDays Austin [video, slides]   2014-05-06

Becoming Fearlessly Definite & Resourceful, ChefConf [video, slides]   2014-04-17

Services in Go: from Proof-of-Concept to Production, GolangVan [video, slides]   2014-02-05

Interests

Augmented Reality, Digital Contracts & Reputation

Espresso, Cigars, Food, & Flavor

Community Organizing, Volunteering & Open Source
